CUMULATIVE INDEX OF AUTHORS FOR 1978

Alexander, C. S., 479
Alexander, R. W., 473
Alker, G. J., Jr., 358
An, T., 241 (corres.)
Anderson, R. E., 133
Andonian, C., 649
Assor, D., 611 (corres.)
Averback, P., 600

Baird, S., 47
Barenberg, S., 693
Benjamin, S. P., 693
Benkoël, L., 649
Bhagavan, B. S., 567
Biempica, L., 114
Bloodworth, J. M. B., Jr., 439
Bloustein, P. A., 713
Brecher, G., 615
Breslow, A., 238 (corres.)
Bronson, R., 602
Buchanan, R., 355
Butcher, E. C., 25

Carnes, W. H., 594
Carter, H., 345
Casanova, P., 649
Chamlian, A., 649
Chejfec, G., 377
Chen, M., 705
Chen, W., 253, 705
Churg, A., 143
Clement, P. B., 726
Coburn, T. P., 199
Colvin, R. B., 71
Conway, J. J., 635
Cooper, J. F., 618
Costabile, D., 345
Cotelingam, J. D., 234

Dahlin, D. C., 199
Dardick, I., 321
Davey, F. R., 285
Davis, R. L., 309
Dillard, R., 471

Edmondson, H. A., 211
Eisenstaedt, W. F., 611 (corres.)
Elias, H., 679
Enjoji, M., 269
Evans, D. J., 122 (corres.)

Factor, S. M., 114
Favre, J., 649
Feinberg, L. E., 93
Feiner, H., 589
Ferguson, C. C., 463
Fink, D. J., 621
Fisher, B., 523
Fisher, E. R., 523
Fong, B. B., 679
Fornasier, V. L., 455
Foti, A. G., 618
Frankel, K., 609 (corres.)
Freedman, S. R., 111
Friedman, L., 259
Fromowitz, F., 157

Gaffney, J. S., 259
Gale, R. P., 295
Galen, R. S., 240 (corres.), 621
Galera-Davidson, H. L., 553
Galichia, J. P., 479
Gilles, F. H., 602
Gillespie, J. J., 579
Gobel, F. L., 479
Goldman, R. L., 111
Gonzalez-Crussi, F., 189
Gottlieb, A. J., 285
Gould, V. E., 377, 385
Goyette, R. E., 716
Gregorio, R. M., 523
Gupta, P. K., 567

Hall, C. L., 71
Hall, J., 602
Halliday, D., 285
Hartmann, W. H., 122 (corres.)
Hausner, R. J., 473
Hazard, J. B., 237
Hedley-Whyte, E. T., 602
Heilman, E., 589
Hellstrom, H. R., 364
Henry, J. B., 625
Herschman, H., 618
Hill, R. B., Jr., 122 (corres.), 249
Hines, O., 223
Hull, M. T., 189

Ibanez, M. L., 181
Irsa, A. P., 259
Isaacson, P., 355, 661

Jao, W., 385
Johannessen, J. V., 385
Johnson, W. W., 199

Kapernick, P. S., 723
Kaplan, R. A., 127
Kataria, Y. P., 517
Kaufmann, A. F., 594
Kim, Y. H., 229
Kisilevsky, R., 597
Kjeldsberg, C. R., 685
Korényi-Both, A., 358
Kumar, A. P. M., 199
Kurman, R. J., 417

Laffargue, F., 649
Laffargue, P., 649
Lampert, I. A., 122 (corres.)
Langlinais, P. C., 716
Larsson, L.-I., 401
Lennon, V. A., 541
Levine, G. D., 495
Levy, R., 25
Linker, A., 685
Liu, H. M., 635
Luebke, D. C., 211

MacKay, B., 579
Madri, J. A., 157
Majmudar, B., 471, 723
Maldague, P., 175
Marchildon, M. B., 211
Marco, V., 358
Martin, H. F., 487
Marucci, A. A., 285
Massarelli, G., 341
Matilla, A., 553
Maunder, C. A., 531
Maurer, H. S., 635
McCluskey, R. T., 71
McConnell, T. H., 129
McDivitt, R. W., 3
Mendelsohn, G., 607 (corres.)
Mendelsohn, J., 51
Mepham, B. L., 355
Merritt, W. H., 476
Meyer, M. W., 366
Mikity, V. G., 211
Mirkin, D. L., 189
Monnat, R. J., Jr., 705
Mottet, N. K., 253, 705
Muhammad, T., 223
Murphy, J., 625

Naeim, F., 295
Nakamura, R. M., 85
Nakane, P. K., 93
Niwayama, G., 366
Nogales, F. F., Jr., 553
Nogales-Ortiz, F., 553

Oakley, C. M., 531
Ohsato, K., 269
Olson, J. L., 607 (corres.)
Osborne, D. G., 693

Palekar, A. S., 523
Panke, T. W., 716
Phillips, R. S., 723
Piepkorn, M. W., 163
Postlethwait, R. W., 352
Powell, H. C., 366
Prágay, D. A., 358
Pratt, C. B., 199

Raschke, W., 47
Redmond, C., 523
Reichenbach, D. D., 163
Reiner, L., 229
Rhodes, R. H., 211, 309
Richardson, J. B., 463
Robinson, M. J., 610 (corres.)
Romas, N. A., 620
Rosai, J., 495
Roth, J. A., 345
Rouse, R., 25

Saito, R., 234
Salis, B., 341
Sapon, S. R., 618
Savage, R. A., 608 (corres.)
Seaman, J. P., 685
Sell, S., 23, 63
Shah, K. H., 597
Sharma, H. M., 517
Sheibani, K., 608 (corres.)
Shelburne, J. D., 352
Shiftan, T. A., 51
Singh, G., 364
Singh, J. K., 223
Slatkin, D. N., 259
Smith, C., 373
Smith, G. S., 295
Smith, J. W., 199
Someren, A., 476
Sommers, S. C., 375
Stapleton, K., 455
Suffin, S. C., 594
Susann, P. W., 471

Tagliarini, F., 649
Tan, E. M., 85
Tanda, F., 341
Tannenbaum, M., 620

Taylor, C. R., 417
Taxy, J. B., 331
Thurlbeck, W. M., 492
Tubbs, R. D., 608 (corres.)
Tubbs, R. R., 693

Urizar, R. E., 223

Vácha, J., 239 (corres.)
van Bogaert, L. J., 175
Vollmer, R. T., 352
Volpé, R., 429
Vongsvivut, S., 635

Wagner, B. M., 1
Wagner, M., 366
Wang, N.-S., 600
Warner, N. E., 417
Warnke, R., 25
Watanabe, H., 269
Weedon, D., 124 (corres.)
Weissman, I. L., 25
Wheeler, J. E., 232
Williams, C. C., 455
Wilson, R. A., 181
Winn, R. W., 114
Woodard, B. H., 352
Wright, D. H., 123 (corres.), 661

Yamada, G., 93
Yao, T., 269
Yarom, R., 531

Zafranas, A., 517

CUMULATIVE INDEX OF SUBJECTS FOR 1978

ACETYLCHOLINE RECEPTORS, cellular immune responses to, thymus and, 543
Acromion, malignant histiocytoma in, ultrastructure of, 199–209
Actinomycosis, genital, intrauterine contraceptive devices and, 567–578
Adenocarcinoma, of lung, large cell undifferentiated carcinoma and, 143–156
Adenoma, brunnian, of urinary bladder, 229–231
Adenomatosis coli, familial, gastric lesions in, 269–283
Aluminum, pulmonary granulomatosis following exposure to, 705–711
Amyloid deposition, in immunoblastic lymphadenopathy, 157–162
Amyloidosis, cardiac, in hereditary neuropathic amyloidosis, diagnosis of, by endomyocardial biopsy, 479–483
Anaplastic carcinoma, of thyroid, fine structure of, 392
Anemia, aplastic, bone marrow transplantation in, morphologic aspects of, 295–308
Animal models, in study of tumor immunity, 63–69
Animals, experimental, autologous immune complex in, 79
Anthrax, inhalation, in home craftsman, 594–597
Antiacetylcholine receptor antibodies, effect of, on
  muscle, in vitro, 544–545
  in vivo, 545–547
  multiple specificities of, 543–544
Antigens, nuclear, autoantibodies to, recent study of, 85–91
  viral, and immune response, in hepatitis B, 93–109
Aplastic anemia, bone marrow transplantation in, morphologic aspects of, 295–308
Arachnoiditis, adhesive, Thorotrast induced, with meningioma and schwannoma, 366–370
Asbestos exposure, in malignant mesothelioma, 253–258
Aspiration biopsy, in breast cancer, 17
Autoantibodies, to nuclear antigens, recent study of, 85–91
Autoimmune disease, atypical lymphocytes in, 53
Autoimmune thyroiditis, pathology of, 432–433
Autologous immune complex, in experimental animals, 79
Autologous immune complex diseases, in man, 79–80
Autopsy, future use of, 127–129
Axillary metastases, prognosis of breast cancer and, 15

BARTHOLIN'S GLANDS, mucocele-like changes in, 111–114
Biopsy, aspiration, in breast cancer, 17
Bladder, urinary, brunnian adenoma of, 229–231
Bone marrow, gelatinous transformation of, 685–692
Bone marrow transplantation, in aplastic anemia, morphologic aspects of, 295–308
Breast, cancer of, aspiration biopsy in, 17
  prognosis in, anatomical features and, 10–17
  pure primary epithelial, histologic classification of, 175–180
  regional lymph node involvement and prognosis of, 15
  tumor doubling time and, prognosis of, 12
  tumor necrosis in, 523–530
  carcinoma of, 3–21
Bronchial and tracheal tissues, postmortem, in ultrastructural studies, technique for use of, 463–470
Brown fat histogenesis, hibernoma and, 321–329
Brunnian adenoma, of urinary bladder, 229–231
Burn patient, lymphoid proliferation simulating Hodgkin's disease in, 716–723

CALCITONIN, in treatment of Paget's disease, histologic changes following, 455–461
Cancer. See also *Tumor(s)* and specific lesions.
  breast. See *Breast, cancer of.*
  lung, leukotic spread in, 600–602
  prostatic, detection of, by radioimmunoassay, 618–620
  thyroid, fine structure of, 385–400
    Hashimoto's thyroiditis and, 437
Carcinoid, thymic, morphologic features of, 506
Carcinoma, anaplastic, of thyroid, fine structure of, 392
  breast, 3–21
    pure primary epithelial, histologic classification of, 175–180
  cloacogenic, histogenesis of, 579–587
  collision, of gastric cardia, 471–473
  follicular, of thyroid, fine structure of, 386
  large cell undifferentiated, of lung, fine structure of, 143–156
  mucoepidermoid, of esophagus, 352–354
  papillary, of thyroid, fine structure of, 389
  pulmonary, "undifferentiated," ultrastructural and biochemical analysis of, 377–384
  squamous cell, of thyroid, fine structure of, 389

Carcinoma cells, of colon, nuclear fragmentation in, 679–684
Carcinoma in situ, diagnostic specificity of, 373–374
  intraductal, of breast, 8
  lobular, of breast, 7
Carcinosarcoma, of thyroid, fine structure of, 397
Cardia, gastric, collision carcinoma of, 471–473
Cardiac amyloidosis, in hereditary neuropathic amyloidosis, diagnosis of, by endomyocardial biopsy, 479–483
Cardiomyopathies, element concentrations in, electron microscopic x-ray microanalysis of, 531–539
Chemical residues, toxic potential of, 1
Chondroma, tenosynovial, of hand, 476–479
Chondrosarcoma, of uterus, case report of, 726–732
Clinical laboratories, effective utilization of, 625–633
Cloacogenic carcinoma, histogenesis of, 579–587
Colitis, ischemic, in lymphomatoid granulomatosis, 364–366
Colon, carcinoma cells of, nuclear fragmentation in, 679–684
Contraceptive devices, intrauterine, genital actinomycosis and, 567–578
Contraceptives, orally administered, and estrogens, breast cancer and, 5
Corticospinal degeneration, post-traumatic retrograde, in man, 602–607
Cutaneous sarcoidosis, immunohistochemistry of, 517–522

Diabetic glomerulosclerosis, etiology of, 439–453
  morphologic course of, 451
  obliterative, etiology of, 444
Drugs, and toxic agents, atypical lymphocytes in response to, 53

Education, graduate medical, pathology and, 133–142
Encephalopathy, methotrexate, neuropathologic study of, 635–648
Endocarditis, infective, cell-wall deficient bacteria and, 163–173
Endocrine pancreatic tumors, histogenesis of, 403–404
  histopathology and cell pathology of, 405
  origin and effects of, 401–416
  peptides as markers of, 404
  types of, 406
Environmental pathology, problems in, 1–2
Epithelial hyperplasia, atypical, breast cancer and, 6
Esophagus, mucoepidermoid carcinoma of, 352–354
Estrogen receptor protein, breast cancer and, 17
Estrogens, and orally administered contraceptives, breast cancer and, 5
Exudative-deposit lesions, in diabetic glomerulosclerosis, 444

Fat histogenesis, brown, hibernoma and, 321–329
Fibrocystic disease, breast cancer and, 3
Fibro-osseous component, in intracranial lesions, 309–319
Fibrosis, localized congenital hepatic, presentation of, as abdominal mass, 473–476
Foreign medical graduates, recruitment of pathologists and, 249

Gastric. See also *Stomach.*
Gastric cardia, collision carcinoma of, 471–473
Gastric lesions, in familial adenomatosis coli, 269–283
Genital actinomycosis, intrauterine contraceptive devices and, 567–578
Germ cell tumors, of thymus, 509–512
Giant cells, multinucleated, in myeloma kidney, 114–120
Gliomatosis, peritoneal, in extraovarian teratoma, 232–234
Glomerular capillary microaneurysms, in diabetic glomerulosclerosis, 446
Glomerulocapsular adhesions, in diabetic glomerulosclerosis, 446
Glomerulosclerosis, diabetic, etiology of, 439–453
  morphologic course of, 451
Graduate medical education, pathology and, 133–142
Graft rejection, atypical lymphocytes in, 53
Granuloma, plasma cell, of stomach, 355–358
Granulomatosis, lymphomatoid, with ischemic colitis, 364–366
  pulmonary, following exposure to aluminum, 705–711

Hamartoma, mixed, of liver, light and electron microscopy of, 211–221
Hand, tenosynovial chondroma of, 476–479
Hashimoto's thyroiditis, pathology of, 433–437
Heart. See *Cardiac.*
Health Professionals Educational Assistance Act, pathology and, 137–139
Hemangioendothelioma, malignant, of thyroid, fine structure of, 397
Henoch-Schönlein anaphylactoid purpura nephropathy, electron microscopic study of, 223–229
Hepatic. See also *Liver.*
Hepatic fibrosis, localized congenital, presentation of, as abdominal mass, 473–476
Hepatic leiomyosarcoma, ultrastructural study of, 713–715
Hepatitis B, immune complexes in, 80–82
  virus antigens and immune response in, 93–109
Hepatolienal fusion, embryologic etiology of, 234–236
Hibernoma, brown fat histogenesis and, 321–329
Hilar cells, ovarian, ultrastructural and enzyme histochemical study of, sympathetic nerves and, 649–659
Histiocytoma, malignant, in acromion, ultrastructure of, 199–209
Histiocytosis, malignant, of intestine, malabsorption and ulcerative jejunitis and, 661–677
Hodgkin's disease, atypical lymphocytes in, 53
  lymphoid proliferation simulating, in burn patient, 716–723
  of thymus, 506

Hormones, formation of atypical lymphocytes and, 54
steroid, peliosis of liver and, 331–340
House staff, need for, pathology and, 140
Hyperplasia, atypical epithelial, breast cancer and, 6

IMMUNE COMPLEX(ES), autologous, in experimental animals, 79
in circulation, detection of, 75–77
in tissues, detection of, 73–74
Immune complex mediated diseases, detection of, 71–84
etiologic factors in, 77–79
Immune response, and virus antigens, in hepatitis B, 93–109
Immunity, tumor, animal models in study of, 63–69
Immunization, atypical lymphocytes following, 53
Immunoblastic lymphadenopathy, amyloid deposition in, 157–162
Immunoglobulin, intracellular and cell surface, in non-Hodgkin's lymphoma, detection of, 285–294
Immunologic detection, of prostatic acid phosphatase, 621–623
Immunoperoxidase steroid localization, in testicular and ovarian tumors, 422
Infarction, of lymph nodes, palisading macrophage reaction in, 597–599
Infectious mononucleosis, atypical lymphocytes in, 52
Infective endocarditis, cell wall-deficient bacteria and, 163–173
Interstitial pneumonitis, desquamative, surface and transmission ultrastructural characteristics of, 693–703
Intestine, malignant histiocytosis of, malabsorption and ulcerative jejunitis and, 661–677
Intracranial lesions, fibro-osseous component in, 309–319
Intrauterine contraceptive devices, genital actinomycosis and, 567–578

JEJUNITIS, ulcerative, and malabsorption, malignant histiocytosis of intestine and, 661–677

KIDNEY, myeloma, multicleated giant cells in, 114–120
Kimmelstiel-Wilson nodule, etiology of, 442

LABORATORY, clinical, effective utilization of, 625–633
in assessment of occupationally related diseases, 487–491
Laboratory data, interpretive reporting of, 129–131
Laboratory medicine, trends in, 615–618
Leiomyosarcoma, hepatic, ultrastructural study of, 713–715
multifocal, of stomach, 345–351
Leukotic spread, in lung cancer, 600–602
Lithopedion, factors in development of, 358–363
Liver. See also *Hepatic.*
leiomyosarcoma of, ultrastructural study of, 713–715
mixed hamartoma of, light and electron microscopy of, 211–221
peliosis of, steroid hormones and, 331, 340
Lung. See also *Pulmonary.*
cancer of, leukotic spread in, 600–602
large cell undifferentiated carcinoma of, fine structure of, 143–156
peripheral tumors of, electron microscopy in, 589–593
postnatal growth of, adult disease and, 492–493
Lymph nodes, infarction of, palisading macrophage reaction in, 597–599
regional, involvement of, prognosis of breast cancer and, 15
Lymphadenopathy, immunoblastic, amyloid deposition in, 157–162
Lymphoblastic lymphoma, of thymus, 503
Lymphocytes, atypical, hormones and formation of, 54
immune function of, 56–58
morphology of, 54–56
occurrence of, 52–54
circulating "atypical," 51–61
immunity and, 26
Lymphoid architecture, normal human, 32–35
Lymphoid organs, antigen dependent changes in architecture of, 31–32
establishment and maintenance of domains in, 26–31
Lymphoid proliferation, simulating Hodgkin's disease, in burn patient, 716–723
Lymphoid system, lymphoproliferative diseases of, 24–45
Lymphoid tissues, murine, in primary lymphomas, 47–50
Lymphoma, histiocytic, of thymus, 505
lymphoblastic, of thymus, 503
monoclonality and, 35–40
non-Hodgkin's, intracellular and cell surface immunoglobulin in, detection of, 285–294
primary malignant, of thyroid, fine structure of, 398
Lymphomatoid granulomatosis, with ischemic colitis, 364–366
Lymphoproliferative diseases, normal lymphoid differentiation and, 35
Lythokelyphopedion, factors in development of, 358–363

MALABSORPTION, and ulcerative jejunitis, malignant histiocytosis of intestine and, 661–677
Malignant disease, atypical lymphocytes in, 53
Malignant hemangioendothelioma, of thyroid, fine structure of, 397
Malignant histiocytoma, in acromion, ultrastructure of, 199–209
Malignant histiocytosis, of intestine, malabsorption and ulcerative jejunitis and, 661–677
Malignant lymphoma, primary, of thyroid, fine structure of, 398
Mammography, in breast cancer, 18
Marrow, bone, gelatinous transformation of, 685–692

Medical education, graduate, pathology and, 133–142
Medical graduates, foreign, pathology and, 135–137
recruitment of pathologists and, 249–252
Medicine, laboratory, trends in, 615–618
Medullary carcinoma, of thyroid, fine structure of, 392
Meningioma, and schwannoma, with Thorotrast induced adhesive arachnoiditis, 366–370
Mesothelioma, malignant, with minimal asbestos exposure, 253–258
Metastases, axillary, prognosis of breast cancer and, 15
Methotrexate encephalopathy, neuropathologic study of, 635–648
Microaneurysms, glomerular capillary, in diabetic glomerulosclerosis, 446
Mononucleosis, infectious, atypical lymphocytes in, 52
Mucoepidermoid carcinoma, of esophagus, 352–354
Murine lymphoid tissues, in primary lymphomas, 47–50
Myasthenia gravis, complement in, 547–549
experimental autoimmune myasthenia gravis and, 542
immunopathology of, 541–551
Myeloma kidney, multinucleated giant cells in, 114–120
Myxoma, primary ovarian, case report of, 723–725

Necrosis, tumor, in breast cancer, 523–530
Nephropathy, Henoch-Schönlein anaphylactoid purpura, electron microscopic study of, 223–229
Nerves, sympathetic, ovarian hilar cells and, ultrastructural and enzyme histochemical study of, 649–659
Nodule, Kimmelstiel-Wilson, etiology of, 442
Nuclear antigens, autoantibodies to, recent study of, 85–91

Occupationally related diseases, clinical laboratory in assessment of, 487–491
Ovarian and testicular tumors, classification of, immunohistologic techniques in, 417–427
Ovarian hilar cells, ultrastructural and enzyme histochemical study of, sympathetic nerves and, 649–659
Ovarian myxoma, primary, case report of, 723–725

Paget's disease, calcitonin in treatment of, histologic changes following, 455–461
Palate, soft, synovial sarcoma of, 341–345
Pancreas, normal, endocrine cells of, development of, 401–403
Pancreatic teratoma, of thymus, 512
Pancreatic tumors, endocrine. See *Endocrine pancreatic tumors.*
Papillary carcinoma, of thyroid, fine structure of, 389
Papilloma, inverted, of urinary bladder, 229–231
Pathologists, recruitment of, 249–252
Pathology, environmental, problems in, 1–2
Peliosis, of liver, steroid hormones and, 331–340
Peptides, as markers, in endocrine pancreatic tumors, 404
Pheochromocytomas, nonfamilial and familial, comparative study of, 181–188
Pigment, black pulmonary, $^{13}C/^{12}C$ ratio in, 259–267
Plasma cell granuloma, of stomach, 355–358
Pneumonitis, desquamative interstitial, surface and transmission ultrastructural characteristics of, 693–703
Postmortem tracheal and bronchial tissues, in ultrastructural studies, technique for use of, 463–470
Prostatic acid phosphatase, immunologic detection of, 621–623
Prostatic cancer, detection of, by radioimmunoassay, 618–620
Public Law 94-484, pathology and, 137–139
Pulmonary. See also *Lung.*
Pulmonary carcinoma, "undifferentiated," ultrastructural and biochemical analysis of, 377–384
Pulmonary granulomatosis, aluminum induced, 705–711
Pulmonary pigment, black, $^{13}C/^{12}C$ ratio in, 259–267

Radiation, atypical lymphocyte formation and, 54
Radioimmunoassay, in detection of prostatic cancer, 618–620
Radiolabeled drugs, toxic potential of, 1
Riedel's struma, pathology of, 437

Sarcoidosis, atypical lymphocytes in, 53
cutaneous, immunohistochemistry of, 517–522
Sarcoma, soft tissue, intranuclear filaments in, 189–198
synovial, of soft palate, 341–345
Schwannoma, and meningioma, with Thorotrast induced adhesive arachnoiditis, 366–370
Seminoma, of thymus, morphology and development of, 509
Soft palate, synovial sarcoma of, 341–345
Soft tissue sarcoma, intranuclear filaments in, 189–198
Somatostatinoma, identification of, 412
Squamous cell carcinoma, of lung, large cell undifferentiated carcinoma and, 143–156
of thyroid, fine structure of, 389
Steroid hormones, peliosis of liver and, 331–340
Stomach. See also *Gastric.*
multifocal leiomyosarcoma of, 345–351
plasma cell granuloma of, 355–358
Struma, Riedel's, pathology of, 437
Sympathetic nerves, ovarian hilar cells and, ultrastructural and enzyme histochemical study of, 649–659
Synovial sarcoma, of soft palate, 341–345

Tenosynovial chondroma, of hand, 476–479
Teratoma, extragvarian, with peritoneal gliomatosis, 232–234
pancreatic, of thymus, 512

Testicular and ovarian tumors, classification of, immunohistologic techniques in, 417–427
Thorotrast, as cause of adhesive arachnoiditis, with meningioma and schwannoma, 366–370
Thymoma, microscopic and clinicopathologic features of, 498
Thymus, carcinoid of, morphologic features of, 506
  cellular immune responses to acetylcholine receptors and, 543
  germ cell tumors of, 509–512
  Hodgkin's disease of, 506
  hyperplasia and neoplasia of, current concepts of, 495–515
  lymphoblastic lymphoma of, 503
  pancreaticteratoma of, 512
  seminoma of, morphology and development of, 509
Thyroid, anaplastic carcinoma of, fine structure of, 392
  cancer of, fine structure of, 385–400
    Hashimoto's thyroiditis and, 437
  carcinosarcoma of, fine structure of, 397
  follicular carcinoma of, fine structure of, 386
  malignant hemangioendothelioma of, fine structure of, 397
  medullary carcinoma of, fine structure of, 392
  nonepithelial tumors of, fine structure of, 397
  primary malignant lymphoma of, fine structure of, 398
  squamous cell carcinoma of, fine structure of, 389
Thyroiditis, autoimmune, pathology of, 432–433
  Hashimoto's, pathology of, 433–437
  infectious, pathology of, 429–430
  pathology of, 429–438
  subacute, pathology of, 430–432
Toxic agents, and drugs, atypical lymphocytes in response to, 53
Tracheal and bronchial tissues, postmortem, in ultrastructural studies, technique for use of, 463–470
Tumor immunity, animal models in study of, 63–69
Tumor markers, localization of, in testicular and ovarian tumors, 420
Tumor necrosis, in breast cancer, 523–530
Tumors, endocrine pancreatic. See *Endocrine pancreatic tumors.*
  germ cell, of thymus, 509–512
  nonepithelial, of thyroid, fine structure of, 397
  ovarian and testicular, classification of, immunohistologic techniques in, 417–427
  peripheral, of lung, electron microscopy in, 589–593
  yolk sac, with pure and mixed polyvesicular vitelline patterns, 553–566

Ulcerative jejunitis, and malabsorption, malignant histiocytosis of intestine and, 661–677
Urinary bladder, brunnian adenoma of, 229–231
Uterus, chondrosarcoma of, case report of, 726–732

Virus antigens, and immune response, in hepatitis B, 93–109
Viruses, breast cancer and, 5

Yolk sac tumors, with pure and mixed polyvesicular vitelline patterns, 553–566
